

E-Zeven Lifting Yoke

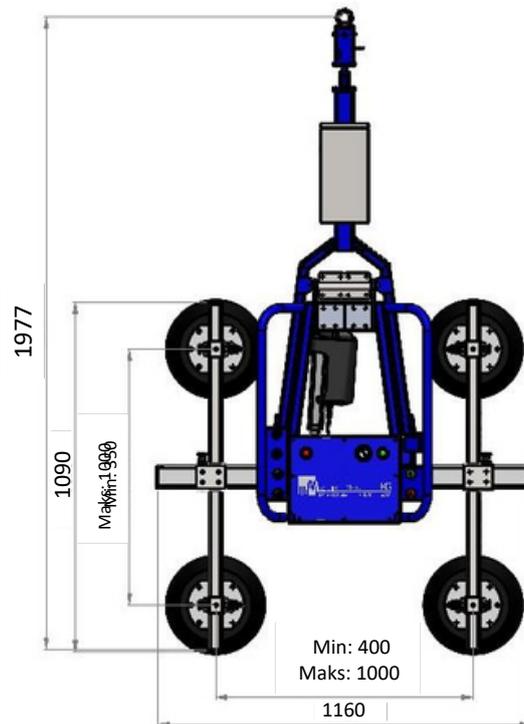

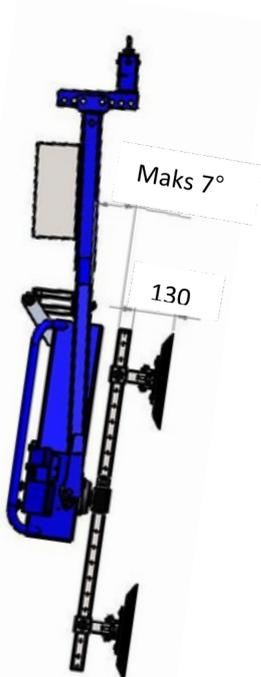

Danish-made, user-friendly lifting yoke for lifting vertical plates/windows. The lifting yoke can tilt the workpiece 7 degrees using pneumatic cylinders and rotate it 90 degrees with an electric actuator.

- Lifting capacity up to 500 kg
- Delivered with 4 pcs. 11" suction cups
- Valves on each suction cup, allowing them to be individually closed
- 130 mm offset on the suction cups
- Each suction cup has 10 mm spring travel
- Movable arms on the main beam, and movable suction cups on the arms
- Minimum load weight: 15 kg
- Adjustable center of gravity at the top of the lifting yoke
- Buttons for switching vacuum on/off and for tilting and rotating the workpiece
- Built-in safety switch for parking (the chain must be slack)
- When parked, compressed air is blown into the suction cups, ensuring fast release of the workpiece
- Vacuum gauge for vacuum level
- Supplied with compressed air at 6–6.5 bar
- CE-approved and complies with EN13155
- Net weight: 80 kg
- Equipped with an electric actuator

Spare kit available, which reduces air consumption.
