

Foil Lifter

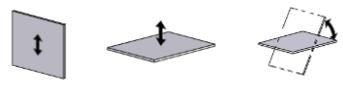

Danish-manufactured, user-friendly lifting beam for lifting horizontal and vertical foil rolls. The lifting beam can tilt the rolls 90 degrees with a cylinder from Kinetrol.

- Available in 4 sizes with a lifting capacity of up to 960 kg
- Delivered with a 3" mandrel
- Automatic center of gravity adjustment
- Stepless tilting of the roll (up to 90 degrees)
- Can lift rolls with a length of up to 600 mm (lifting capacity decreases as roll length increases)
- Roll diameter of up to 800 mm
- 2 buttons for unloading, preventing unintentional unloading
- Indicator for mandrel, allowing the operator to see if the foil roll lifter is ready for lifting
- Powered by compressed air at 6-6.5 bar
- CE-approved and compliant with EN13155.

The lifting beam can also be expanded with additional equipment:

- **Larger/double mandrel**, making it possible to lift rolls with a larger inner diameter

Maximum roll diameter	Type of foil roll lifter	Maximum Roll Length and Lifting Capacity				Lifting beam weight
		200 mm	400 mm	500 mm	600 mm	
In mm:						
Ø660	No. 9/200	100 kg	70 kg	60 kg	50 kg	23 kg
Ø800	No. 12/400	220 kg	150 kg	130 kg	115 kg	37 kg
Ø800	No. 14/400	520 kg	360 kg	310 kg	270 kg	65 kg
Ø800	No. 16/400	960 kg	700 kg	620 kg	550 kg	125 kg
